This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

PREFACE.

The present catalogue is supplementary to the one published in 1858, and contains the larger portion of the books that have since been added to the Library. In the former Catalogue the title of each book was entered under the name of the author, when known, under the subject, and under the important words of the title. The arrangement of the supplement is substantially the same, but in its details it conforms in some respects to the "Index of the Lower Hall of the Boston Public Library." The titles are not, as in the Catalogue, strictly confined to one line; the imprint is given with the author's name only, and omitted in the other entries. Some new headings for subjects are introduced, under which are included many titles from the former Catalogue. The cross-references also have been increased; these apply to the Catalogue as well as to the Supplement, and in some instances wholly to the former. Works of Fiction and Juveniles, including a few popular works from other departments, are arranged at the end in separate divisions, the one of Authors, and the other of Titles. Some errors that have been noticed while the volume was in press are corrected on the next page. Other and more important ones may occur, but none, it is believed, that will occasion practical inconvenience. To Mr. B. F. H. Reed, for assistance in reading the proofs, we are particularly indebted. A future supplement will include a collection of Congressional and State Documents, and files of bound newspapers; for the reception of which a room is about to be prepared. Of Congressional Documents the Library has — besides those entered in the Catalogue — a set nearly complete from the twenty-eighth to the present Congress. Additional value has been given to these Documents by the publication of an Analytical Index, carefully prepared by the officers of the Boston Public Library, and so arranged that it can be used by every Library possessing any portion of them. The Newspapers include, among others, a file of the Mercury complete from 1807, and files more or less complete of the Medley, Columbian Courier, Standard, and other New Bedford papers. It is desirable that these should be completed. Persons having copies, even if few in number, will confer a favor by presenting them to the Library, where they will be carefully preserved and rendered useful. A respectable, and rapidly increasing collection of pamphlets, has been partially arranged and catalogued. The work will be completed as soon as additional shelves are provided to receive them.
